

Specification MAP/CV109/Issue 4 Dated 31.12.40. To be read in conjunction with K1001 ignoring clauses:- 5.2, 5.3.			<u>SECURITY</u> <table border="1"> <tr> <td><u>Specification</u> RESTRICTED <i>Unclass</i></td> <td><u>Valve</u> UNCLASSIFIED</td> </tr> </table>		<u>Specification</u> RESTRICTED <i>Unclass</i>	<u>Valve</u> UNCLASSIFIED
<u>Specification</u> RESTRICTED <i>Unclass</i>	<u>Valve</u> UNCLASSIFIED					
→ Indicates a change						
<u>TYPE OF VALVE</u> - Transmitting Klystron <u>CATHODE</u> - Indirectly heated <u>ENVELOPE</u> - Glass-ummetallised <u>PROTOTYPE</u> - 9.P.K.5.			<u>MARKING</u> See K1001/4			
			<u>PACKING</u> See K.1005			
<u>RATING</u>		Note	<u>BASE</u> I.O.			
Heater Voltage (V)	4.0		Pin	Electrode		
Heater Current (A)	2.5		1	No connection		
Max. Peak Anode Voltage (kV)	10.0		2	Heater		
Max. Collector Dissipation (W)	170		3	No connection		
Operating Frequency for which valve is set up (Mc/s)	3280		4	No connection		
			5	No connection		
			6	No connection		
			7	Heater & Cathode		
			8	No connection		
			Connection to collector electrode is made via the diffuser.			
			<u>DIMENSIONS</u> See drawing on page 4.			
<u>NOTES</u>						
A - The terms anode and resonator are synonymous.						
B - In operation this valve should be supplied with forced air cooling such that the temperature of the edge of the collector disc does not exceed 100°C.						

To be performed in addition to those applicable in K1001.

	Test Conditions			Test	Limits		No. Tested	Note
	Vh	Vc(kV)	Vr(kV)		Min.	Max.		
a	4.0	0	0	Ih (A)	2.25	2.75	100%	
b,1	4.0	7.0	7.0	Collector + resonator current say Ia Value to be noted (mA)	280	380	100%	
2	4.0	7.0	7.0	Note value of collector current say Ib (mA)			100%	1
c	From measurements made in test b.			Value of Ib/Ia	0.9 ± 4%		100%	
d	4.0	7.0	7.0	Peak power output at frequency of 3280 Mc/s. (W)	250	-	100%	1,2.
e	4.0	-0.1	Adjusted to give 10mA resonator current. Current in collector circuit read on sensitive galvanometer (say 30μA full scale reading) with valve cold (Vh =0) and then with valve hot, Vr being left on.	Change in collector current (μA)	-	2.0	100%	
f	4.0	2.5 approx.	2.5 approx. Vc=Vr= value required to give 170W. dissipation in collector.	No beam or other signs of softness shall be visible.			10%	
g	4.0	7.0	7.0 Other conditions as in test clause 'd' except that P.R.F. = 13,000 per second. 1. After setting up, the H.T. supply is switched off for a period of 10 mins. The H.T. supply is then reapplied and the P.R.F. re-set to 18,000 per second. 2. The H.T. supply is again switched off for a period of 10 mins. and then re-applied with P.R.F. re-set to 1000 per second.	1. Frequency of oscillation (Mc/s) 30 secs. after applying H.T. 5 mins. after applying H.T. 2. Frequency of oscillation (Mc/s) 30 secs. after applying H.T. 5 mins. after applying H.T.	3280 ± 2 3280 ± 2 3280 ± 2 3280 ± 2	100% 100%		

NOTES

- 1 - In test 'd' above, the anode voltage shall be pulsed with a pulse length of $3/\mu\text{sec.}$ and a P.R.F. of 18,000 per second. In tests 'b', and 'c', modulation conditions may be similar to those in test 'd', or other conditions may be submitted for approval.
- 2 - Comparative measurements of output should be made by means of a lamp. For this measurement the size of coupling loop should be such that maximum output is obtained with the loop oriented to a position such that its plane is at an angle of 10° to a plane containing the principal axis of the resonator and the centre line of the coupling loop entry.
- 3 - V_c = collector voltage, V_r = resonator voltage.

8 Fixing Bolts, size 4.B.A., equally spaced on pitch circle of 57mm. diameter.

Clamping rings 3mm. thick.

Fixing lugs $\frac{1}{8}$ " thick.

Coupling loop entry 0.5" x 26 T.P.I. to be to B.S.F. medium fit tolerances (Table 24A BSS 84/1940 after plating).

Tuning Plungers in equally spaced holes 0.5" x 26 T.P.I. to B.S.F. medium fit tolerances (Table 24A B.S.S. 84/1940 after plating). Lock Nuts 0.71 inches across flats.

Centre line through coupling loop entry and keyway on spigot base. Coupling loop entry and keyway should be at 180° to each other.

All dimensions in millimetres unless otherwise stated.
