Specification MOSA/CV1589/CV1590	SECURITY			
Issue 6 Dated 1.11.54 To be read in conjunction with B.S.448,B.S.1409 & Klool	Specification UNCLASSIFIED	<u>Valve</u> UNCLASSIFIED		

## ----- Indicates a change

TYPE OF VALVE - Cathode Ray Tube  TYPE OF DEFLECTION - Electrostatic. Suitable for symmetrical deflection.  BULB - Internally coated with conductive coating.  SCREEN - CV1589 - GGM27 or YYM36 CV1590 - GGM26 or WWM42 or COM52					MARKING See K1001/4 BASE B.S.448/B12D			
PROTOTYPES - CV1589 - VCR511A CV1590 - VCR511B						CONNECTIONS

Beam Current (μA)			20		<u>DIMENSIONS</u> See Drawing on Page 3			

## NOTES

- A. A magnetic shield shall be supplied fitted to the valve and be such as to provide adequate screening from internal magnetic field.
- B. When viewing the screen with the valve positioned such that the base spigot is uppermost, a positive voltage applied to the terminal x1 shall deflect the spot to the right, and a positive voltage applied to the terminal y1 shall deflect the spot downwards.
