

Note to the user.

This Joint Service Specification K1005 contains over 140 pages.

For your convenience, a number of "navigation links" have been made.

Go to the Index, page 3 of this document.

A mouse-click on the Section or Appendix of interest, presents the top page of the selection.

From 1963 untill August 1965, 4 Amendments were released to keep this specification up to date.

The amendment sheets are retained and filed at the end of the specification.

Amendment 4 is found on top, page number 123.

Earlier amendments follow in sequence, 3, 2, 1.

Superseded pages are filed with the amendment, containing the instruction for removal.

JOINT SERVICE SPECIFICATION

K1005

ISSUE No.3

FEBRUARY 1963

(SUPERSEDING ISSUE No.2. DATED JUNE 1956)

**PACKAGING OF
ELECTRONIC VALVES**

Issued on behalf of the Technical Valve Committee by:-

MINISTRY OF AVIATION
T.L.5.b/T.V.C. OFFICE
CASTLEWOOD HOUSE
77 - 91, NEW OXFORD STREET
LONDON, W.C.1.

AMENDMENT RECORD SHEET

[illegible][illegible]

JOINT SERVICE SPECIFICATION K1005

INDEX

This specification contains the following sections and Appendices:

1. SCOPE.
2. GENERAL REQUIREMENTS.
3. STANDARDS OF PACKAGING.
4. PROTECTION OF VALVES AGAINST PHYSICAL DAMAGE.
5. PROTECTION OF VALVES AGAINST CLIMATIC HAZARDS.
6. IDENTIFICATION AND MARKING OF PACKAGES.
7. TESTING OF PACKAGES.

Appendices:-

- A. List of valve types showing Valve Approving Authority and Packaging References.
- B. Materials.
- C. Schedule of Tests.
- D. Sprung Suspension Containers.
- E. Packaging Approval Procedure and List of Approval Authorities.
- F. Agreed Industry Standard.
- G. Packaging of Radioactive Valves.
- H. Packaging of Valves Containing Magnets for Air Transport (To be added).

JOINT SERVICE SPECIFICATION K1005

PACKAGING REQUIREMENTS FOR ELECTRONIC VALVES, TUBES AND SEMICONDUCTOR DEVICES

1. SCOPE

This specification defines the requirements for packaging electronic valves, tubes and semiconductor devices supplied to the Joint Services (Navy, Army, R.A.F., G.P.O. and other Authorities), and is subject to periodic review.

2. GENERAL REQUIREMENTS

- 2.1. For the purposes of this specification the definitions of packaging terms contained in the Glossary of Terms in Specification DEF-1234 shall apply, except as otherwise defined in this document.
- 2.2. When K1005 Joint Service Standard Packages are required this specification shall be read in conjunction with the appropriate Packaging Instruction Sheet (Form 673) issued by the relevant Package Design Authority. In the event of any difference between the Form 673 and the requirements of this specification, the former shall take precedence.
- 2.3. The packaging normally acceptable for each particular valve, tube or semiconductor type is set out in Appendix 'A' to this specification. This will either be listed as "K1005 Agreed Industry Standard" or will refer to the appropriate Form 673. If no such details are given in Appendix 'A' reference must be made to the Package Design Authority.
- 2.4. Manufacturers shall package in accordance with an existing Form 673 or alternatively, to submit drawings which can form the basis of a separate section of the S.P.I.S., after approval by the Package Design/Approval Authority.

3. STANDARDS OF PACKAGING

The standard of packaging required will be stated in each contract and will normally be one of the following:-

3.1. "K1005 - Joint Service Standard"

This shall apply to all types of valve, tube or semiconductor device for which the Agreed Industry Standard level of packaging has not been accepted.

The package must afford full climatic protection to the supply and maintain the contents in a serviceable condition during

transport within the Country of Origin and for a minimum period of five years from the original date of packaging under storage conditions which provide full weather protection. These packages must meet the tests laid down in Appendix 'C'.

- 3.1.1. Certain valves require special consideration. In these cases by arrangement with the Package Design/Approval Authority the packaging test requirements may be omitted, modified or added to.
- 3.1.2. Valves packaged to this requirement shall be in individual containers. In certain instances a quantity may be overpacked into an intermediate container with the approval of the Package Design Authority.

3.2. "K1005 - Agreed Industry Standard"

This is an agreed level of packaging as defined in the Standard given in Appendix 'F'.

- 3.2.1. Only manufacturers who have accepted the terms and conditions of the Agreed Industry Standard will be invited to tender for valves so packaged.

The list of firms complying with this condition is given in Appendix 'F' (Section 2).

NOTE. Requests by manufacturers for inclusion in the list shall be made in writing to the Secretary, Ministry of Aviation, Room 113, Castlewood House, 77-91 New Oxford Street, W.C.1, marked for the attention of Sec. V.P.S.C.

- 3.2.2. The manufacturer is free to choose the design, material, degree and form of protective cushioning used, within the limitations laid down by the Standard. Appendix 'A' lists the types of valves, tubes and semiconductor devices for which this form of packaging has been agreed.

4. PROTECTION OF VALVES AGAINST PHYSICAL DAMAGE

- 4.1. The majority of receiving valves and semiconductor devices require little protection against physical damage other than that afforded by blocking to prevent movement within a container. This is normally effected by the employment of die-cut devices, moulded materials or corrugated paper and board used in various ways.
 - 4.1.1. When more resilient cushioning materials are needed, selection of the most appropriate material or cushioning system will depend mainly upon the inherent physical characteristics of the valve. The following factors will have to be taken into account:-

- (i) the ability of the valve to withstand physical shocks.
- (ii) its size, shape and weight.
- (iii) the materials used in the construction of the valve.
- (iv) susceptibility of the valve to possible corrosive effects of the cushioning medium.

A guide to the selection of the most suitable material will be found in Appendix 'B'. For the "K1005 Joint Service Standard" the precise method adopted for any particular valve will be stated on the appropriate Form 673.

4.2. Miniature Valves

- (i) Valves with pins must be packaged with pin protectors fitted.
- (ii) Valves with flying leads must be packaged with straight and untwisted leads or with pin protectors fitted and the leads bent back over the envelope without twisting.

NOTE. For standard pin and lead protectors, see Specification K1001.

4.3. Sub-Miniature Valves

Sub-Miniature valves with flying leads must be packaged with the leads straight and untwisted.

4.4. Semiconductor Devices

The wire leads of semiconductor devices must not be bent except for a slight curl at the extreme end of the leads.

4.5. Unshielded Microwave Crystal Diodes

In addition to any other requirements of this specification unshielded microwave crystal diodes shall be protected by wrapping the device completely in metal foil and inserting in a container. The metal foil shall be turned over so as not to puncture the container.

5. PROTECTION OF VALVES AGAINST CLIMATIC HAZARDS

- 5.1.** Where valves and/or materials used in the construction of the package require protection against climatic hazards, the means by which this shall be achieved will be specified on the appropriate Form 673.

6. IDENTIFICATION AND MARKING OF PACKAGES

6.1. General

Waterproof non-fading ink shall be used for all figuring and lettering. Typewritten labels shall not be used. The size of the lettering shall be appropriate to the size of the label or container used. For labels the figuring and lettering shall be spaced evenly over the surface. Preferably printing shall be Gill Sans Bold Condensed and shall not be smaller than 10 point.

6.1.1. Warning labels, when required, shall be specified in the Form 673 and shall normally conform to the list given in DEF-1234, Part II, Section 6, Appendix 'A'. All special warning labels peculiar to electronic valves shall be printed in Red.

6.1.2. All labels shall be protected by one of the materials listed in Appendix 'B' (not applicable to A.I.S.).

6.2. Primary Carton Marking

The following particulars shall be applied.

- (i) N.A.T.O. Stock Number.
 - (ii) E.I.A. Number, when quoted on the Valve Specification.
 - (iii) VALVE ELECTRONIC CV (CV number as appropriate).
 - (iv) Serial Number, when applicable.
 - (v) Factory Identification Code.
 - (vi) A yellow splash, if one appears on the valves packed in the carton.
- 6.2.1.** When a transparent water-vapourproof barrier is used directly round the valve and the identification particulars on the valve are not easily legible then a label marked as above shall be included within the barrier prior to sealing.

This label shall be legible externally.

6.2.2. Where individual containers are not subsequently over-packed in an intermediate container they shall comply with the marking requirements of intermediate containers plus serial number when applicable.

6.3. Intermediate and Bulk Container Marking

The following particulars shall be applied:-

- (i) N.A.T.O. Stock Number.

- (ii) E.I.A. Number if appearing on primary container.
- (iii) VALVE ELECTRONIC CV
- (iv) Month (as a word) and year of dispatch.
- (v) The factory identification code.
- (vi) Quantity.
- (vii) A YELLOW splash if appearing on the primary container.

6.4. Radioactive Valves

See Appendix 'G'.

7. TESTING OF PACKAGES

- 7.1.** The packaged valve, tube or semiconductor shall be submitted to the appropriate tests for the standard of package.
- 7.1.1.** K1005 Joint Service Standard - Appendix 'C' of this specification.
- 7.1.2.** K1005 Agreed Industry Standard - Appendix 'F' of this specification.
- 7.2.** In all cases the electrical measurements before and after tests shall be made in accordance with K1001, Section 14 or K1007, Section 1.3.7. or Section D App. III as appropriate.

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'A'

List of Valve Types showing Valve Approving Authority and Packaging References

INTRODUCTION

This Appendix lists in numerical order all 'CV' Valve Types with their appropriate Joint Service Catalogue Number, Packaging Approval Authority and Packaging Specification Reference Number.

The Packaging References are defined in the following paragraphs:-

1. 'A.I.S.1', 'A.I.S.4', etc.

Valve to be packed to the 'Agreed Industry Standard'. (The figure indicates the appropriate container size. See Appendix 'F').

2. 'S.P.I.S.' or Packaging Specification Reference Number

Indicates that a Services' Packaging Instruction Sheet (Form 673) has been prepared. Details to be obtained from Valve Packaging Approving Authority.

3. 'S.S.C.1', 'S.S.C.4', etc.

Indicates that valve must be packed in a Sprung Suspension Crate. (See Page 2 of Appendix 'D' for details).

4. 'R.A.'

The reference 'R.A.' indicates that the valve may be radioactive. When the valve is radioactive Special Packaging Instructions must be obtained from the Approving Authority.

5. All other references 'TES/3008', 'VAL/1003', etc. are the Reference Numbers given by the Valve Approving Authority to the S.P.I.S. (Form 673) for the Valve concerned.

6. Where no Packaging Reference is given the Approving Authority should be consulted.

JOINT SERVICE SPECIFICATION K1005**APPENDIX 'B'****MATERIALS****1. GENERAL**

The following materials are recommended for use in all forms of packing and are mandatory, unless otherwise agreed with the Packaging Design/Approval Authority, in the case of "K1005 Joint Service Standard" packaging.

1.1. Container Materials

- (i) Chipboard, Kraft Lined - DEF-1249.
- (ii) Board, Corrugated, Double Faced, Fine Flute - DEF-1254.

1.2. Containers

- (i) Cases, Corrugated, E.1067.
- (ii) Cases, Chipboard, Kraft Lined, DEF- (E.1069).
- (iii) Drums, Fibreboard and Composite - B.S.1596.
- (iv) Cases, Plywood, Batten Construction - UK/DIS/1937.
- (v) Cases, Plywood, Metal Edged - UK/CIS/1940.
- (vi) Boxes, Rigid and Carton, Collapsible - UK/CIS/1830.
- (vii) Cases, Wood Packing - DEF-1303.
- (viii) Containers, Aluminium, Cylindrical, Seamless - UK/CIS/2017.

1.3. Sealing Material

- (i) Tape, Kraft Paper, Gummed - DEF-1299.
- (ii) Tape, Pressure, Sensitive, Adhesive (Waterproof Fabric) - DEF- (C.S.2191).
- (iii) Adhesive, Waterproof - C.S.2201.
- (iv) Rubber/Resin Cement No.3 (General Purpose) - C.S.2558.

1.4. Marking Materials

- (i) Paint Marking (Lead-Free) - DEF-1176.

- (ii) Ink, Waterproof, Non-Fading - Commerical.

1.5. Label Protection

- (i) Adhesive, Emulsion, Polyvinyl Acetate - C.S.2743.
- (ii) Tape, Pressure Sensitive, Adhesive (Waterproof, Transparent) - DEF- (C.S.2501).
- (iii) Lacquer, Cellulose, Nitrate for Labels - DEF-1222.

1.6. Barrier Materials

- (i) Polythene Film for Packaging - C.S.2596.
- (ii) Foil, Metal, Laminated Sheet (Heat Sealable) - DEF-1236.
- (iii) Wrapping, Mouldable Waxed, Grease Resisting - DEF-1237.
- (iv) Paper, Kraft, Creped, Waxed - DEF-1238.
- (v) Liners, Waterproof Bag - E.1536.
- (vi) Paper, Kraft Union - DEF-1240.
- (vii) Paper, Kraft, Waterproof Rotproof - DEF-1241.
- (viii) Lead Foil - Commercial.

1.7. Wrapping Materials

- (i) Cellulose Film - Commercial.
- (ii) Thin Polyvinyl Chloride Sheeting (Flexible Unsupported) - B.S.1763 Type 1.
- (iii) Paper, Tissue, Wrapping - DEF-1251.
- (iv) Paper, Imitation Kraft Wrapping - Commercial.

1.8. Cushioning Materials

- (i) Rubberised Hair - UK/AID/919.
- (ii) Wood Wool (loose) - B.S.2548.
- (iii) Cellulose Wadding - DEF-1248.
- (iv) Paper, Corrugated, Single Faced, Coarse Flute - DEF-1253.
- (v) Felt, Needleloom - B.S.2628.
- (vi) Rubber, Expanded - C.S.2808.

- (vii) Rubber, Sponge - C.S.3067.
- (viii) Corrugated Paper, Fine Flute - Commercial.
- (ix) Wood Wool Mouldings - UK/AID/950.
- (x) Spring Systems.

1.9. Load-spreading, Blocking and Shock-absorbing Material

- (i) Expanded Polystyrene H.Q.P.O./18, Parts 1 and 2.
- (ii) Wood Wool Mouldings - UK/AID/950.
- (iii) Chipboard, Kraft Lined - DEF-1249.
- (iv) Board, Corrugated, Double Faced, Fine Flute - DEF-1254.

2. The following additional materials are also suitable for Agreed Industry Standard:-

- (i) Urethane Foam - Polyester or Polyether - Commercial Grade.
- (ii) Polyvinyl Acetate Foam - Commercial Grade.
- (iii) Polyvinyl Chloride Foam - Commercial Grade.
- (iv) Flexible Expanded Polystyrene.

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'C'

SCHEDULE OF TESTS

1. GENERAL

Three identical packs shall be provided. They shall be marked as shown on page 2 of this Appendix and subjected to the following tests in the sequence given.

- 1.1. After subjection of a package to the tests, the valves shall meet the electrical tests required by K1001, 14 or K1007 Section 1.3.7. or Section D App. III as appropriate, the package shall be fit for storage, the marking and identification particulars shall be legible and the climatic protection shall not be impaired.

2. DROP TEST

Each package shall be dropped on to a flat concrete surface as indicated below:

	<u>Height of drop (measured from lowest point of package)</u>	
Packages up to and including 90 lb	4 ft 6 in.	
Packages exceeding 90 lb	3 ft 0 in.	
	<u>Rectangular Packages</u>	<u>Cylindrical Packages</u>
(i) <u>Flat Drop</u>	Once on to each face in the sequence: C, D, A, B, E, F.	Once on to lines: ae, bf, ^{cg} de , dh, base (efgh) and head (abod) in the sequence given. Am 11-1
(ii) <u>Corner Drop</u>	Once on to BLACK corner (CBF), once on to RED corner (ADE).	Not applicable.
(iii) <u>Edge Drop</u>	Not applicable.	Once on to point X. Once on to point Y.

One package shall then be withdrawn from test and examined fully, including the condition of its contents. The remaining two packs shall be submitted to the following tests.

MARKING OF TEST PACKAGES

Rectangular Packages

See Fig. 1

Mark one end 'F' and relate all other positions to 'F'.

Top or lid	A
Left hand side	B
Bottom or base	C
Right hand side	D
Remote end	E
Base corner (C.B.F.)	Black
Lid corner (A.D.E.)	Red
Base corner (C.D.F.)	White
Lid corner (A.B.E.)	Green

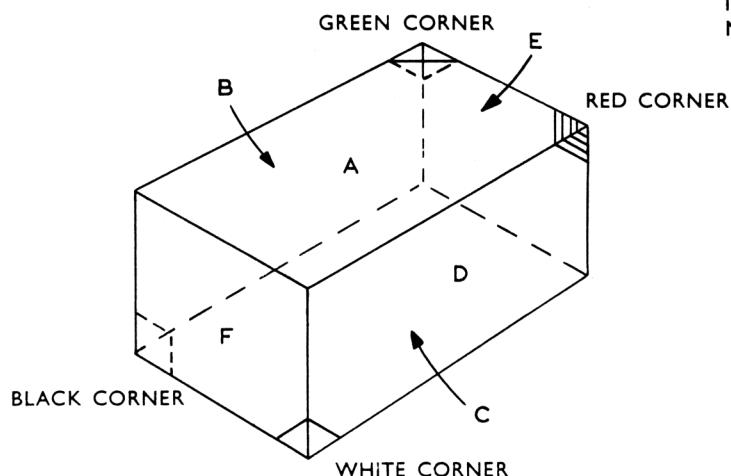

FIG. 1

Cylindrical Packages

See Fig. 2

<u>Side seam</u>	vx
<u>Head</u>	abcd
Centre	o
Point diametrically opposite v	y
Diameter so that angle yoa = 45°	ac
Second diameter at right angles to ac	bd
<u>Base</u>	eigh
Centre	p
Point diametrically opposite x	z
Diameter so that angle xpg = 45°	eg
Second diameter at right angles to eg	fh

WHERE MOVABLE LOCKING COLLAR
IS PRESENT THE LEVER HOUSING
MUST BE SITUATED AT POINT Y

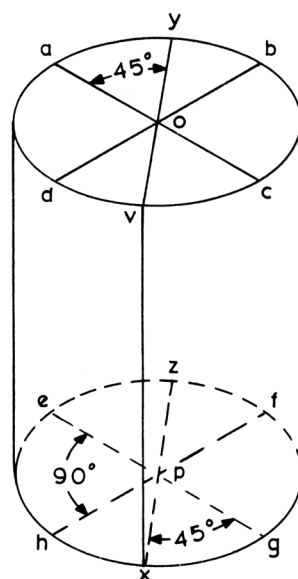

FIG. 2

3. WATER SPRAY TEST

- 3.1. Water spray shall be applied to the packages for a period of five minutes from each of the four positions indicated on ~~Pages~~ ^{Figures} 3 and 4 of this Appendix, change of direction being made as rapidly as possible. Rectangular packages of not less than 10.1/2 ft length by 10.1/2 ft width may be subjected to water spray from all the positions indicated, simultaneously. Amdt. 1
- 3.2. The packages shall then be removed and allowed to dry in a temperature not less than 60°F (16°C) and not more than 75°F (24°C) with a maximum relative humidity of 75 per cent for 24 hours. One package shall then be withdrawn from test and examined fully, including the condition of its contents. The two packs shall then be submitted to the ~~following~~ ^{defined in} tests ~~in~~ ^{paragraphs 4, 5 and 6} Amdt. 1

RECTANGULAR PACKAGES

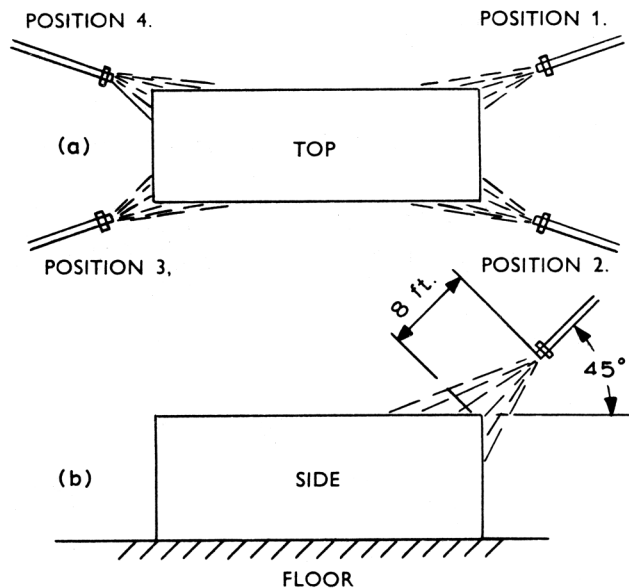

FIG. 3

The package standing on its base, will be subjected to a water spray (from a nozzle operating at a pressure of 30 ± 5 lb per sq.in.) conforming to the following specification:-

- The spray must be in the form of a solid water cone, of apex angle 35° .
- Water consumption to be 100 ± 10 gallons per hour.
- Over 50% of water drops to be between 3 mm and 5 mm in diameter.

The spray will be projected downwards from a distance of 8 ft and at an angle of 45° to the horizontal plane of the lid, so as to fall on each of the four uppermost corners of the package in turn (Fig. 3 (b)). The axis of the nozzle in each position shall be in the same vertical plane as a diagonal line joining the sprayed corners to the opposite corner on the lid (Fig. 3 (a)).

NOTE: Details of a suitable nozzle may be obtained from the Inspection Authority quoted in the contract.

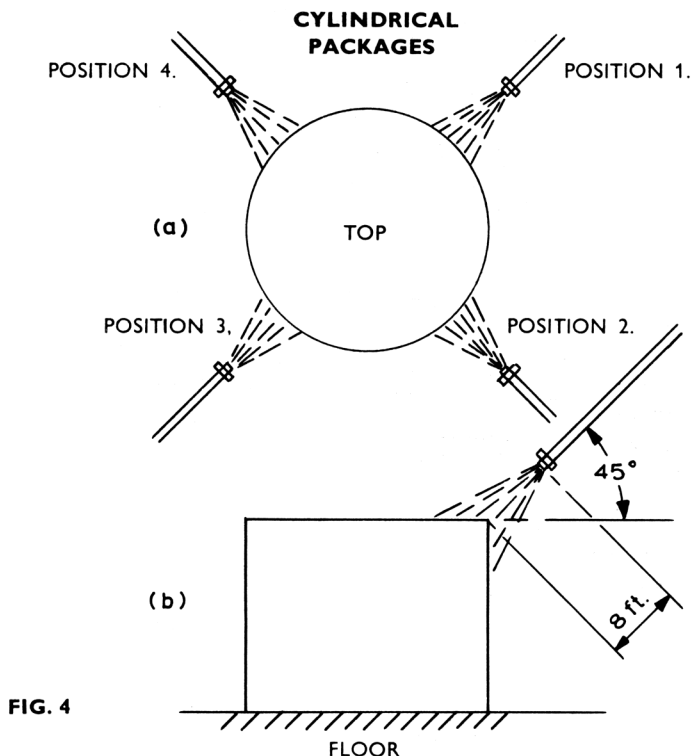

FIG. 4

The spray will be applied in a similar manner to that for rectangular packages, but from each of four positions in turn at intervals of 90° .

4. SECOND DROP TEST

The package shall be dropped on to a flat concrete surface, as indicated below:

	<u>Height of drop (measured from lowest point of package)</u>
Packages up to and including 90 lb	4 ft 6 in.
Packages exceeding 90 lb	3 ft 0 in.
<u>Rectangular Packages</u>	<u>Cylindrical Packages</u>
(i) Once on to face 'A'.	Once on to head (abcd).
(ii) Once on to WHITE corner (CDF).	Once on to point z.
(iii) Once on to GREEN corner (ABE).	Once on to point x.

5. STATIC LOAD TEST

5.1. Test Conditions:

- (i) The maximum stack height shall be 12 ft (144 inches).
- (ii) The maximum (evenly distributed) superimposed load shall be calculated as follows:-

$$L = \frac{M - H}{H} \times W$$

Where L = Superimposed Load, in lbs.

M = Maximum height of stack in inches.

H = External height in inches of the pack in its stacked position.

W = Weight of the pack in lbs.

- (iii) The load shall be applied evenly over the upper face of the test package for a period of not less than twenty-four hours. The package shall stand on a hard, level surface, in the position in which it is normally stored.
- (iv) One package shall then be withdrawn from test and examined fully, including the condition of its contents. The remaining pack shall be submitted to the non-mandatory tests, if required.

6. NON-MANDATORY TESTS

(To be performed at the discretion of the Package/Design Approval Authority)

6.1. Vibration

The package shall be fixed to a vibration table capable of being vibrated in the vertical direction throughout the range 1-15 cycles per second, at an amplitude of ± 0.05 in. The package shall be vibrated for a period of 15 minutes in each of the three directions as follows:-

Rectangular Packages

With surface 'A' uppermost
With surface 'B' uppermost
With surface 'F' uppermost

Cylindrical Packages

Standing on its base (efgh)
Standing on line ae
Standing on line dh

The frequency shall be changed steadily through the range from 1-15 cycles per second and back again in not less than three minutes.

If resonance has been noted in either the package or its contents, the package shall be vibrated at each resonant frequency for a further period of 15 minutes.

6.2. Random Shock Test Machine

The details of the test machine will be inserted in due course.

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'D'

SPRUNG SUSPENSION CONTAINERS

1. GENERAL

1.1 GENERAL

Sprung suspension containers are specified as a combination of five parts each detailed as a separate sub-section in this Appendix.

These parts consist of:-

1.2 CONTAINER INTERNAL DIMENSIONS (Pages 3 & 4)

Provides for a range of container sizes, one of which will be associated with each type of valve regardless of the type of crate construction selected from the alternatives specified in sub-section 1.6.

1.3 BAG CONSTRUCTION AND DIMENSIONS (Pages 5 to 15)

Covers a range of bags for suspension in the crate.

1.4 PROTECTING DEVICE DIMENSIONS (Pages 16 to 25)

Provides for a range of the protecting devices required to protect special valves while in the bags.

1.5 SPRING DIMENSIONS (Pages 26 & 27)

Specifies a range of springs to cover the limits of elasticity required.

1.6 CRATE CONSTRUCTION (Pages 29 to 31)

Covers alternative methods of construction of the outer container using various materials.

2. CONTAINERS

2.1 INDIVIDUAL CONTAINERS

The valves requiring sprung suspension packing are specified in Appendix 'A' by a Sprung Suspension Container Number e.g. SSC1, SSC2, etc. Reference to the List of Sprung Suspension Containers given on page 2 of this Appendix will provide particular

(a) internal dimensions of the crate

(b) bag and protecting device (if any)

(c) springs

to be used. The method of construction of the crate is optional within the alternative specified herein.

2.2 DOMESTIC CONTAINER

There is no separate domestic container.

2.3 EXPORT CONTAINER

Where an export container is used to hold a number of individual containers the combined weight should not exceed 80 lbs. This is the maximum weight that can normally be carried by one man.

- NOTES
1. No.15 Spring for top Suspension No.14 Spring for bottom Suspension Refer also to Design Authority for details of canvas support.
 2. No.17 Spring for top Suspension No.7 Spring for bottom Suspension.
 3. 'S' denotes two Springs in series.
 - * 4. Bag in central position in crate but rechecking required when valve is placed in bag.
 5. Denotes 'W' Springing with two pickup positions on Harness and three pickup positions on post.
 - × 6. No diagonals to be used in this crate.
 - * 7. The Valve Packaging Authority shall be consulted.

CONTAINER INTERNAL DIMENSIONS

NOTES:-

1. ALL DIMENSIONS GIVEN ARE INTERNAL DIMENSIONS.
2. THE LETTERS C & D INDICATE THE POSITION OF EACH PERMISSIBLE SUSPENSION POINT I.E. THE POINT OF LOCATION OF THE SPRING TO THE CRATE.
3. DRAWINGS ARE PURELY PICTORIAL INDICATING THOSE ESSENTIAL DIMENSIONS REFERENCED IN THE TABLE.

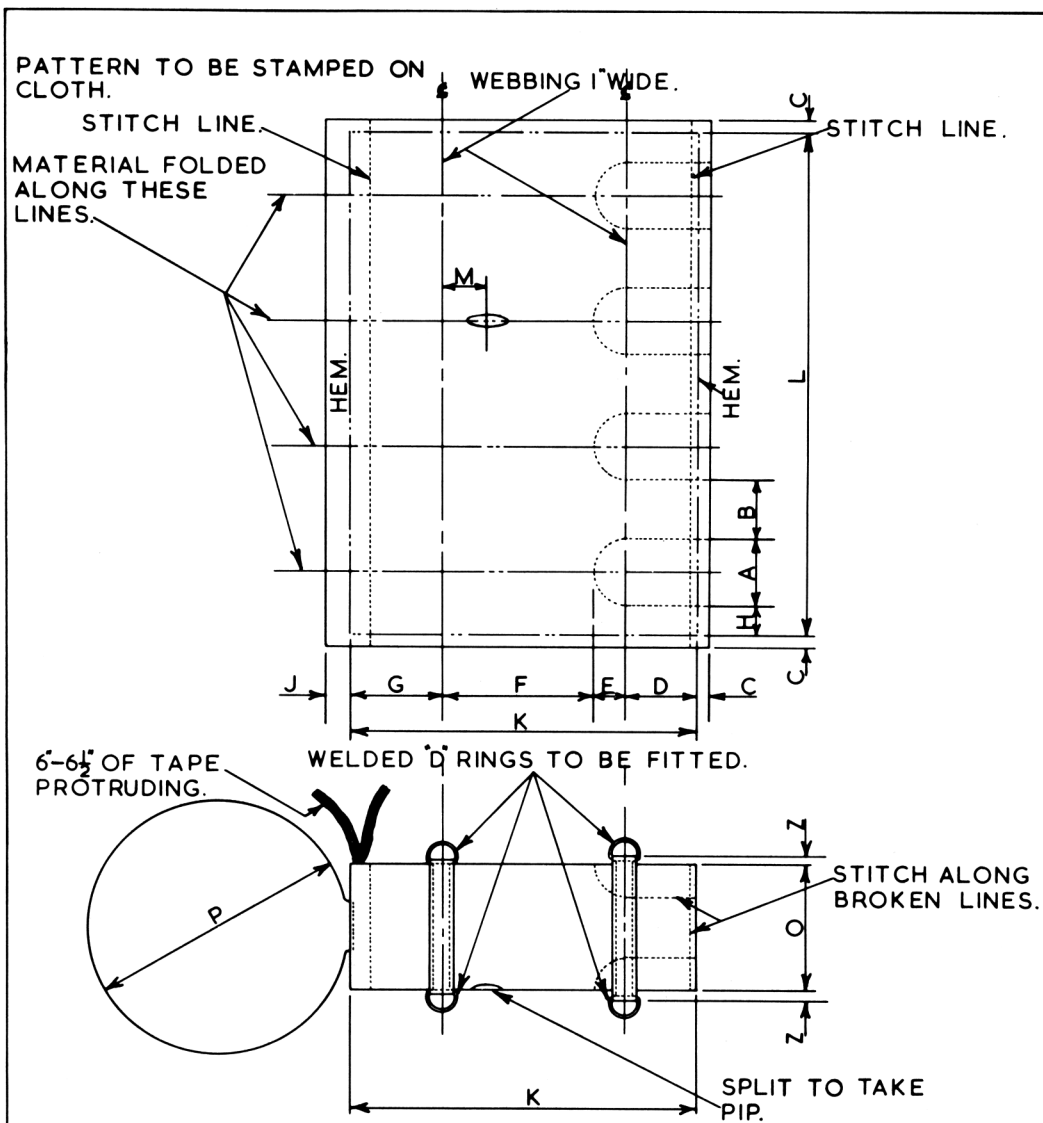

INTERNAL DIMENSIONS OF CRATES IN INCHES

[illegible]

3. BAG CONSTRUCTION

- 3.1 Bags shall be constructed in accordance with the following details.
- 3.2 The canvas used shall comply with specification BS F55 mineral khaki, light proof, rot proof, not corrosive. Webbing, rot proofed 1 in. wide to specification BS F49 or CIS/NF.100 shall be fitted as detailed on the drawings.
- 3.3 Draw cords, when required, shall be cut from tape, cotton, flat, braided 3/8 in. wide and rot proofed.
- 3.4 All sewings shall conform to specification BS F58, 50s/3/3 and shall be rot proofed.
- 3.5 Rot proofing shall be in accordance with BS 2087.

SPRING DATA

MATERIAL:- H.D. STEEL WIRE
E.N. 49B (RANGE 1)
B.S.S. 1408A

FINISH:- SPRING STEEL WIRE SHALL BE
DRAWN GALVANISED OR TREATED
BY AN APPROVED PROCESS (SEE
SPECIFICATION RCS 1000 SECTION 7).

NOTES:-

1. $N = \frac{l}{d}$ CALCULATED TO NEAREST WHOLE NUMBER.
2. SAFE LOAD TAKEN AS 40% ULTIMATE STRESS.
3. SAFE EXTENSION CALCULATED ON INITIAL TENSION + SPRING RATE AND NOT TO EXCEED SAFE LOAD.
4. THE SPRING RATE IS THE INCREASE IN LOAD NECESSARY TO EXTEND THE SPRING A FURTHER INCH ONCE IT HAS BEEN OPENED.

SPRING DATA

[illegible]

4. CRATE CONSTRUCTION

4.1 WOODEN BATTEN CRATE.

The crates shall comply with the relevant drawings and tables of dimensions which form part of this specification or as stated on the S.P.I.S.

- (i) Timber:- The timber used in the construction of crates shall be well seasoned, fine sawn, with moisture content between 15% and 20% and free from all vital knots, shakes, cross grain and signs of decay.
- (ii) Finishes for Metal Parts:- All corner plates, support pins, screws, nuts, bolts, washers, buckles, eyelets and other metal parts shall be treated in accordance with Specification DEF 5000. All nails shall be either resin coated or chemically etched.
- (iii) Hinges, Buckles and Straps:- All buckles and straps shall be in accordance with the drawing on page 32. Hinges shall be constructed from webbing CIS.NF.100 proofed in accordance with B.S.2087 and normally of dimensions 4.1/2 x 1 in.

4.2 CONSTRUCTION

- (i) Body of Crate:- The spring support pins shall be inserted into the corner posts at the specified position and lie alongside the diagonal of the cross-section.

The diagonal battens shall be nailed in position, the nails being inserted from the inside and clenched on the outside of the crate.

The bearers which support the lid shall be nailed in position 3/8 in. below the ends of the corner posts.

For main construction details see drawing on page 30.

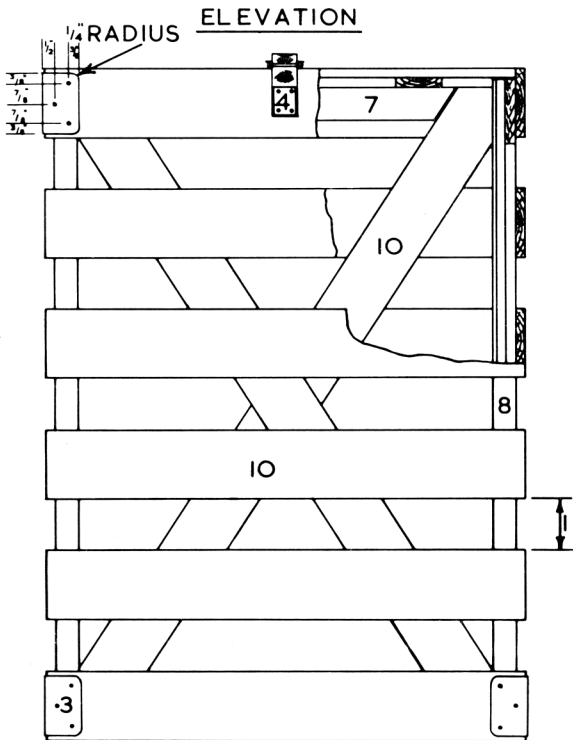

- (ii) Base and Lid:- The lid and base shall be either of openwork batten construction or close boarded. The slats (for openwork construction) or the rectangular lid (for boarded construction) and base pieces shall be nailed to the battens as shown in the drawing on page 30 and so positioned that the centre line of the batten coincides with the centre line of the hinge. Nails shall be clenched on the inside of the crate.

4.3 ASSEMBLY, BASE, LID AND BODY

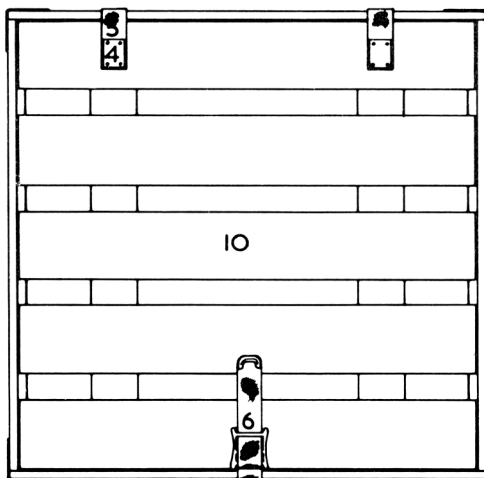

The base and the lid having been fabricated separately shall be assembled with the body as follows:-

- (i) Base:- The base shall be secured to the body of the container by driving nails through the base into the ends of the corner posts and by driving nails through the lower slats of the body of the crate into the base.
- (ii) Lid:- The webbing strap with buckle attached shall be secured to the lid using a strip of mild steel sheet 2 x 1 in. and nails driven through the metal strip and webbing into the battens. Alternately the webbing strap shall be secured by bolts passing through the webbing

and the lid. The bolt shall be secured on the inside of the crate by a nut and large metal washers positioned under the head of the bolt and nut to prevent the bolt being pulled through. The webbing hinges shall be similarly fastened to the lid and body of the crate so that the lid falls accurately into position. The straps and hinges shall be positioned as shown in the drawings on pages 30 and 31.

The strap shall be secured to the body of the crate in a similar manner to the buckle strap and hinges.

- (iii) **Corner Plates:-** The corner plates shall be secured to the crate with nails in the positions detailed in the drawing on page 30.

JOINT SERVICE SPECIFICATION K1005**APPENDIX 'E'****PACKAGING APPROVAL PROCEDURE AND LIST
OF APPROVAL AUTHORITIES**

1. Valves packaged to the Joint Service Standard of packing shall be submitted for Packaging Approval separately from those submitted for Valve Qualification Approval.
- 1.1. The package, as well as any immediate overwrapping, shall be clearly marked "For Packaging Approval. NOT TO BE OPENED."
"For the attention of the Packaging Officer".
- 1.2. A copy of the correspondence should be enclosed with the consignment and copies addressed to the Packaging Officer concerned and the appropriate Production Branch.
2. Where only a small number of a particular valve type is available, or the packaging is of a complex design, a formal request for both electrical and packaging approval should be made to the Valve Approval Authority and the following procedure adopted:-
 - 2.1. Valves for Valve Approval should be submitted in the pack or container for which packaging approval is desired and an equivalent number of individual empty packs should accompany these for the use of the Packaging Officer concerned.
 - 2.2. Each package or container should be clearly marked:-

"For Electrical and Packaging Qualification Approval"
"NOT TO BE OPENED"
"For the attention of the Valve Approval Authority".
 - 2.3. A copy of the correspondence should be enclosed with the consignment and copies addressed to the Packaging Officer concerned and the appropriate Production Branch.
 - 2.4. The list of Valve Qualification and Packaging Approval Authorities is as follows:-
 - (i) ATOMIC ENERGY AUTHORITY
Valve Qualification Approval:-
The Director, U.K. Atomic Energy Authority,
Harwell, Nr. Didcot, Berks.
(Mr. K. Kandiah)

Packaging Approval:-

The D.E.I., Aquila,
Golf Road, Bromley, Kent.
(Mr. A.A. Howgrave)

(ii) ADMIRALTY SURFACE WEAPONS ESTABLISHMENTValve Qualification Approval:-

The Captain Superintendent, A.S.W.E.,
Portsmouth, Gosport, Hants.

Packaging Approval:-

As above.

(iii) ATOMIC WEAPONS RESEARCH ESTABLISHMENTValve Qualification Approval:-

The Director, U.K. Atomic Energy Authority,
A.W.R.E., Aldermaston, Berks.
(Mr. D.E. Blaxill)

Packaging Approval:-

As above.

(iv) G.P.O.Valve Qualification Approval:-

The Engineer-in-Chief, G.P.O., State House,
62a-71, High Holborn, W.C.1.
(S2/2/4)

Packaging Approval:-

As above (S2/1/4). S2/1/5 until 7/2/66
Hea 2062

(v) M.O.A./D.L.R.D.(T)Valve Qualification Approval:-

R.R.E. See para. (ix) below.

Packaging Approval:-

R.R.E. See para. (ix) below.

(vi) M.D.A.P.Valve Qualification Approval:-

M.O.A./D.L.R.D.(A)/AL12(b)2,
Castlewood House, 77-91, New Oxford
Street, W.C.1.
(Sqn. Ldr. A.E. Basford)

Packaging Approval:-

D.E.I. as (i) above.

(vii) ROYAL AIRCRAFT ESTABLISHMENT

Valve Qualification Approval:-

The Director, R.A.E., Radio Dept.,
Sth. Farnborough, Hants.
(Mr. M.S. Rudge)

Packaging Approval:-

D.E.I. as (i) above.

(viii) ROYAL ARMAMENTS RESEARCH AND DEVELOPMENT ESTABLISHMENT

Valve Qualification Approval:-

The Director, R.A.R.D.E., Fort Halstead,
Sevenoaks, Kent.
(Mr. G.R. Bray)

Packaging Approval:-

As above.

(ix) ROYAL RADAR ESTABLISHMENT

Valve Qualification Approval:-

The Director, R.R.E., St. Andrews Road,
Malvern, Worcs.
(Mr. K. Hopkinson)

Packaging Approval:-

As above (Mr. C.N. Gregory).

(x) SIGNALS RESEARCH AND DEVELOPMENT ESTABLISHMENT

Valve Qualification Approval:-

The Director, S.R.D.E., Somerford,
Christchurch, Hants.
(Mr. P. Pinn)

Packaging Approval:-

As above (Mr. R. Pearce).

(xi) COMMERCIAL TYPES

Packaging Approval:-

D.E.I. as (i) above.

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'F'

1. DEFINITION AND CONDITIONS

1.1 DEFINITIONS

The Agreed Industry Standard is a standard of packaging drawn up by a particular industry in conjunction with the Joint Services.

- 1.2 All valves and semiconductors which may be packaged at the request of the Production Authority to this standard are given in Appendix 'A' and indicated by A.I.S. followed by a figure. The figure relates to the maximum container size listed in paragraph 2.4 of this Appendix.

1.3 MANUFACTURERS' OBLIGATION TO REPLACE DAMAGED VALVES

Valves, cathode ray tubes and semiconductor devices proved to be damaged on receipt at their original destination in the United Kingdom will be replaced free of charge or (at the option of the Contractor) credited in full providing a claim is made within fifteen days of receipt of the goods and it is mutually established that the damage was due to the packing not meeting the conditions of this standard.

1.4 PACKAGING APPROVAL AND INSPECTION

No packaging approval or inspection is required for the packaging of items to this standard.

1.5 MANUFACTURERS' AGREEMENT TO AGREED INDUSTRY STANDARD

Manufacturers wishing to supply and/or tender to Agreed Industry Standard must first provide written agreement to meet the conditions of A.I.S. This agreement shall be submitted to:

The Secretary, Valve Packaging Sub-Committee,
Ministry of Aviation, T.L.5b,
Castlewood House, 77-91 New Oxford Street,
London, W.C.1.

A list of those manufacturers who have complied with this requirement is given in Section 4 of this Appendix.

2. AGREED INDUSTRY STANDARD OF PACKAGING (For Electronic Valves and Semiconductors)

- 2.1 This Standard of packaging covers all items individually packed in containers (normally in Primary Cartons) and subsequently overpacked in an Intermediate Container.
- 2.2 The quantities packed in an Intermediate Container shall be Standard for any given type.
- 2.2.1 The packaging material used should be chosen from those not likely to induce corrosion under storage conditions which provide full weather protection.

NOTE: Corrosion. The pins, leads and/or external metal parts of the electrical device shall not show corrosion, such as would cause unsatisfactory operation of the device.

2.2.2 The cushioning of the Intermediate Container shall be sufficient to ensure adequate protection for the packed article when dropped 3 ft. 0 in.

2.3 INTERMEDIATE CONTAINER

Valves shall be packed in one of the following maximum standard sizes of container for the quantities shown. (Quantities less than these may be packed in smaller containers.)

Size	Quantity	Maximum Dimensions
(1)	100	16 × 16 × 8 in.
(2)	50	16 × 16 × 18 in.
(3)	25	19 × 19 × 12 in.
(4)	12	22 × 18 × 14 in.
(5)	6	22 × 16 × 18 in.
(6)	100	5 × 5 × 10 in. (Or alternative shape, not exceeding this volume.)

2.4 TESTING

2.4.1 Drop Test

Intermediate Containers shall be dropped 3 ft. 0 in. on to a flat concrete or stone surface.

(a) Once on to ends each of top and bottom

(b) Once on to each of two adjacent sides*

(c) Once on to each of two corners.

*Where the valve is asymmetrical, the container shall be dropped once on to each of the four sides.

2.4.2 Electrical Tests

To prove the suitability of cushioning, the valves shall then meet the electrical tests required by specifications K1001.14 or K1007 Sections 1.3.7 or Section D Appendix III, as appropriate.

2.5 IDENTIFICATION AND MARKING

2.5.1 As stated in K1005, in addition the words 'Agreed Industry Package' shall appear in black either on the container or on an attached label.

3. VALVE AND SEMICONDUCTOR OUTLINES FOR AUTOMATIC INCLUSION IN AGREED INDUSTRY STANDARD

3.1 Unless otherwise specified valves and semiconductors conforming to the outlines listed in either paragraphs 3.1.1 or 3.1.2 will be automatically included in Appendix 'A' for packaging in accordance with Agreed Industry Standard and the appropriate carton size shall apply.

3.1.1 Semiconductors

3.1.2 Valves

A list of Container Sizes will be included against the K1001/A1/Drg. Nos. at a later date.

4. LIST OF MANUFACTURERS WHO HAVE ACCEPTED THE CONDITIONS OF A.I.S.

4.1 The following list of manufacturers have provided their written agreement to the conditions of A.I.S. in accordance with paragraph 1.5 of this Appendix.

Manufacturer	Locations
Associated Electrical Industries Ltd.	Lincoln and Brimsdown
G. & E. Bradley Ltd.	Neasden Lane, N.W.10
British Tungsram Ltd.	Tottenham
Brush Crystal Co. Ltd.	Hythe, Southampton
Claude General Neon Lights Ltd.	Wembley
Elliott - Litton	Borehamwood
E.M.I. Electronics Ltd.	Hayes
English Electric Valve Co. Ltd.	Chelmsford
Ericsson Telephones Ltd.	Beeston, Notts.
S.G. Fairchild Ltd.	South Ruislip, Middlesex
Ferranti Ltd.	Chadderton, Dundee & Edinburgh
General Electric Co. Ltd.	Wembley
Hall Electric Ltd.	Anglers Lane, London, N.W.5
Hivac	Ruislip
Hughes International (U.K.) Ltd.	Glenrothes
International Rectifiers Ltd.	Oxted, Surrey
Joseph Lucas Ltd.	Park Street, London
Marconi W.T. Co. Ltd.	Chelmsford
Microwave and Semiconductor Devices Ltd.	Luton
M.O. Valve Co. Ltd.	Hammersmith
Mullard Ltd. (including Associated Semiconductor Manufacturers Ltd., Electronic Tubes Ltd. and Mullard Radio Valve Co. Ltd.	Mullard House, Torrington Place, W.C.
Newmarket Transistors Ltd.	Newmarket
Nore Electric	Southend-on-Sea
Rank - Cintel Ltd.	Sydenham, London
R.C.A. Great Britain Ltd.	Windmill Road, Sunbury-on-Thames, Middx.
Semiconductors Ltd.	Swindon
Standard Telephones & Cables Ltd.	Footscray, Paignton and Harlow
Sylvania Thorn Ltd.	Enfield
Texas Instruments Ltd.	Bedford
Thorn - A.E.I. Radio Valves & Tubes Ltd.	Rochester, Brimsdown, Sunderland
Twentieth Century Electronics	New Addington
Walmore Electronics Ltd.	Drury Lane, London

JOINT SERVICE SPECIFICATION K1005**APPENDIX 'G'****PACKAGING OF RADIOACTIVE VALVES****1. DEFINITION OF A RADIOACTIVE VALVE**

For the purpose of this Specification a radioactive valve is defined as any valve which bears the agreed radioactive marking as given in Specification K1001, 4.1.5.

**2. GENERAL REQUIREMENT FOR PACKAGING
RADIOACTIVE VALVES**

- 2.1.** The package shall ensure that the level of radiation measured at the surface of both individual and bulk packages containing radioactive valves shall not exceed 0.4 millirads per hour.

NOTE. For present convenience in measurement this shall be considered equivalent to 0.4 milliroentgens per hour.

- 2.2.** When the radiation level in the normal pack is found to exceed this requirement the matter must be reported to the Packaging Design/Approval Authority for re-design of the package.

3. PACKAGE MARKING

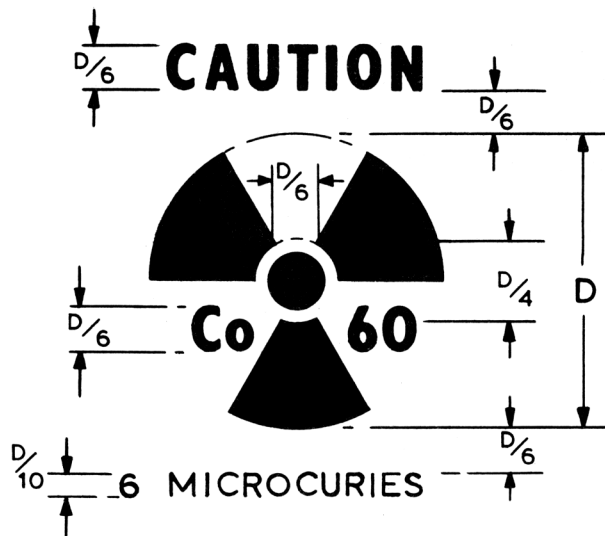

- 3.1.** Each PACKAGE (including Primary cartons) which contains one or more radioactive valves will be marked at each end and on two opposite sides with the four following items:-

- (a) The word "CAUTION" in positive lettering, i.e. printed in the imprinting colour.
- (b) A three-bladed Radioactivity Symbol.
- (c) The Chemical Symbol (s) for the Radioactive substance (s) within the valve.
- (d) The total Source Strength in microcuries of all Radioactive substances within the Package.

An example of this marking is given in Fig. 1.

3.2. Colour and sizes of Warning Markings

- (a) Imprinting colour for Fig. 1.
796 Dark Violet to British Standard 381C or
47142 Magenta to American Standard FED-STD-595.
- (b) Background colour.
White or orange if desired.

Recommended warning marking for packages containing one or more radioactive valves.

(The example given above shows the chemical symbol "Co60" for Cobalt 60.)

(c) Size of Imprinting.

Dimension D (Fig. 1) is to be varied as follows:-

Where smallest side dimension (Y) or smallest end dimension (Z) of Package is:-	Size of 'D' to be respectively
---	--------------------------------

Below 2 inches	$\frac{Y}{2}$ or $\frac{Z}{2}$
----------------	--------------------------------

From 2 to 6 inches	$\frac{Y}{3}$ or $\frac{Z}{3}$
--------------------	--------------------------------

Above 6 inches	$\frac{Y}{4}$ or $\frac{Z}{4}$
----------------	--------------------------------

with maximum of 6 inches.

3.3. Marking of Packages of American Manufactured Valves

The current American practice as given in United States Military Specification MIL-M-19590 is acceptable for Joint Service use.

JOINT SERVICE SPECIFICATION K.1005
ISSUE NO.3 DATED FEBRUARY, 1963

AMENDMENT NO.4

1. Appendix A

- (i) Insert manuscript amendments as given on pages of this amendment.
- (ii) Remove and destroy existing pages and substitute new pages as follows:-

Remove Pages Numbered
K.1005/3/App. A -

Substitute New Pages of this
Amendment

-/23 and -/24

Pages 4, 5 and 6

-/39 and -/40

Pages 7, 8 and 9

-/45 and -/46; -/47 and -/48

Pages 10, 11, 12 and 13

-/55 and 56

Pages 14 to 19 inclusive.

2. Amendment Record Sheet

Record this amendment in the appropriate space in Page 2 of Specification K1005.

T.V.C. Office

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'A'

References to columns are by number as though the columns were numbered 1 to 5, twice from left to right, e.g. the columns headed 'Approving Authority' are referred to as column 3.

CV19	Column 3	Delete 'S.R.D.E.' and substitute 'R.R.E.', Column 4 Insert 'S.P.I.S.'

JOINT SERVICE SPECIFICATION K1005
ISSUE No.3 DATED FEBRUARY, 1963

AMENDMENT No.3

1. Appendix A

- (1) Insert manuscript amendments as given on second page of this amendment.
- (11) Remove and destroy existing Pages K1005/3/App.A/45 to K1005/3/App.A/49 inclusive dated September, 1963.
- (111) Insert new Pages K1005/3/App.A/45 to K1005/3/App.A/56 inclusive dated September, 1964, attached hereto.

2. Amendment Record Sheet

Record this amendment in the appropriate space in Page 2 of Specification K1005.

JOINT SERVICE SPECIFICATION K1005

APPENDIX 'A'

References to columns are by number as though the columns were numbered 1 to 5, twice from left to right, e.g. the columns headed "Approving Authority" are referred to as column 3.

CV254	Column 4	Delete 'S.S.C.19' and substitute 'SX3PH/254'
CV446	Column 4	Delete 'Special Pack 1012'
CV1526	Column 4	Insert 'A.I.S.5'
CV1527	Column 4	Insert 'A.I.S.4'
CV2161	Column 4	Delete 'S.P.I.S.' and substitute 'A.I.S.2'
CV2311	Column 4	Insert 'S.P.I.S.'
CV2312	Column 4	Insert 'S.P.I.S.'
CV2376	Column 4	Insert 'SX3PH/2376'
CV2383	Column 4	Insert 'SX3PH/2383'
CV2407	Column 3	Insert 'R.R.E.', Column 4 insert 'S.P.I.S.'
CV2419	Column 4	Delete 'TES/4923' and substitute 'A.I.S.5'
CV2429	Column 3	Delete 'R.R.E.' and substitute 'A.S.W.E.'
CV2430	Column 3	Delete 'R.R.E.' and substitute 'A.S.W.E.'
CV2659	Column 4	Insert 'A.I.S.4'
CV2935	Column 4	Insert 'A.I.S.5'
CV4020	Column 4	Insert 'A.I.S.1', Column 5 Delete 'R.A.'
CV4048	Column 4	Insert 'A.I.S.'
CV4054	Column 4	Insert 'A.I.S.'
CV4501 to CV4514	inclusive, Column 3	Delete 'E.I.D.' and substitute 'R.R.E.'
CV4515	Column 3	Delete 'E.I.D.' and substitute 'R.R.E.'; Column 4 Insert 'S.P.I.S.'
CV4516 to CV4523	inclusive, Column 3	Delete 'E.I.D.' and substitute 'R.R.E.'
CV5069	Column 3	Insert 'E.I.D.'
CV5083	Column 4	Delete 'TES/5083' and substitute 'A.I.S.1'
CV5167	Column 3	Delete 'E.I.D.' and substitute 'R.R.E.'; Column 4 Insert 'S.P.I.S.'
CV5201	Column 4	Insert 'A.I.S.2'
CV5203	Column 3	Insert 'E.I.D.'; Column 4 Delete 'A.I.S.6' and substitute 'TES5627'
CV5206	Column 3	Insert 'E.I.D.'; Column 4 Insert 'TES5628'
CV5242	Column 4	Insert 'A.I.S.1'
CV5266	Column 3	Insert 'G.P.O.'; Column 4 Insert 'A.I.S.1'

JOINT SERVICE SPECIFICATION K1005

ISSUE No.3 DATED FEBRUARY 1963

Amendment No.2

1. Appendix F

- (i) Remove and destroy existing Pages K1005/3/App.F/3 and K1005/3/App.F/4 dated July 1963
- (ii) Insert new Pages K1005/3/App.F/3, K1005/3/App.F/4 and K1005/3/App.F/5 dated March 1964, attached hereto.

2. Amendment Record Sheet

Record this amendment in the appropriate space in Page 2 of Specification K1005.
