

## MONITOR TUBES

- 90° deflection angle
- 24 cm (9 in) face diagonal; rectangular glass
- 20 mm neck diameter
- white or green screen phosphor

## QUICK REFERENCE DATA

Deflection angle	90°
Face diagonal	24 cm (9 in)
Overall length	227 mm
Neck diameter	20 mm
Heating	11 V/140 mA
Grid 2 voltage	130 V
Cathode	quick heating

## APPLICATION

These monitor tubes are used for information display and data terminals, e.g. in video monitoring equipment, computer terminals, word processors.

The tubes are supplied with different screen phosphors: white (W) or green (GH and GR). They are available with safety panels, which are etched to avoid reflections of light sources.

The tubes can be supplied with additional deflection unit.

## AVAILABLE VERSIONS

monitor tubes without etched safety panel without lugs	M24 - 300 W M24 - 300 GH M24 - 300 GR
monitor tubes with etched safety panel without lugs	M24 - 301W M24 - 301GH M24 - 301GR
monitor tubes without etched safety panel with lugs	M24 - 302W M24 - 302GH M24 - 302GR
monitor tubes with etched safety panel with lugs	M24 - 303W M24 - 303GH M24 - 303GR
