The 6884 is the same as the 6816 except for the following items:

Heater, for Unipotential Cathode:

<table>
<thead>
<tr>
<th>Voltage §</th>
<th>$26.5 \pm 10%$ ac or dc volts</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current</td>
<td>$0.52$ amp</td>
</tr>
</tbody>
</table>

§ Because the cathode is subjected to considerable back bombardment as the frequency is increased with resultant increase in temperature, the heater voltage should be reduced depending on operating conditions and frequency to prevent overheating the cathode and resultant short life.
