PHOTOTUBE

DESCRIPTION

The GL-930 is a two-electrode, gas-filled phototube which is used in measurement and relay applications. The S-1 photosurface used in this tube has a high sensitivity to red radiation. The GL-930 is designed particularly for use where the illumination on the phototube is low.

TECHNICAL INFORMATION

These data are for reference only. For design information refer to specifications.

GENERAL CHARACTERISTICS

Number of electrodes ............................................. 2

Electrical
Spectral response .............................................. S-1
Luminous sensitivity at 90 volts, 6 cycles .......................... 135 microamperes per lumen
Maximum gas amplification ........................................ 10
Interelectrode capacitance ........................................ 2.6 micromicrofarads
Maximum dark current at 90 volts ................................ 0.1 microamperes
Wavelength of maximum response .................................. 8000 angstroms
Sensitivity at maximum response ................................... 0.0130 microampere per microwatt

GENERAL ELECTRIC
TECHNICAL INFORMATION (CONT'D)

Mechanical

Window dimensions .............................................. $1\frac{1}{4} \times 7\frac{3}{8}$ inches
Seated height to center of useful cathode area ............... $1\frac{3}{4} \times 7\frac{3}{8}$ inches
Maximum over-all height ....................................... $3\frac{7}{8}$ inches
Maximum diameter ............................................. $1\frac{3}{4}$ inches
Base .......................................................... M8-046
Mounting position .............................................. Any
Net weight, approx ............................................. $\frac{3}{4}$ ounce
Shipping weight, approx ....................................... 3 pounds

MAXIMUM RATINGS

Anode voltage, d-c or peak a-c .................................. 90 volts
Cathode current density ........................................ 102 microamperes per square inch
Ambient temperature ............................................ 100 centigrade

S-1 PHOTOSURFACE
SPECTRAL SENSITIVITY CHARACTERISTIC
FOR EQUAL VALUES OF RADIANT FLUX AT ALL WAVELENGTHS

RELATIVE SENSITIVITY - ARBITRARY UNITS

WAVELENGTH - ANGSTROM UNITS
